All of the Frac Tanks located on the east side of the AST's secondary containment were full the last time we checked them.

Mickey:

While out on site on 8/7/14, I noticed that the hatch on the end of the Frac Tank South of FT215005 (FT with No ID) was open. I looked into the FT and noticed it was virtually empty. Can you tell me anything about this?

Thanks

Gary Moore
